📅 2017

PROJECTS

Fixed Asset Traking Application

- Built an asset tracking app with HTML5, CSS3, Tailwind CSS, and Angular 17. Created responsive, intuitive UIs for a seamless user experience. Used Tailwind CSS for custom styling. Integrated frontend with backend logic. Leveraged Angular 17 features for performance and functionality. Collaborated with teams to meet client needs and improve efficiency.

Dynamic Official Website Development

- Led a team of six in building websites with Angular, HTML5, and CSS3. Planned projects, allocated resources, and provided technical guidance. Boosted team productivity through strong communication and collaboration. Efficiently addressed challenges and met project objectives. Delivered high-quality results, ensuring successful website projects

SNAKE GAME

- Developed a Snake Game with complex JavaScript logic. Implemented movement, food generation, and collision detection. Used advanced JS concepts like event handling and DOM manipulation. Designed a responsive interface with HTML5 and CSS3. Added score tracking and game-over features. Ensured smooth performance across devices.
